Social Network

Semantic Network

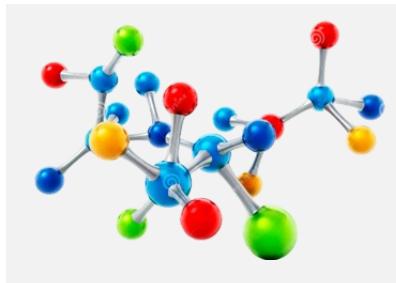

Problem

Volume and variety of surrounding information grow faster than people can perceive it

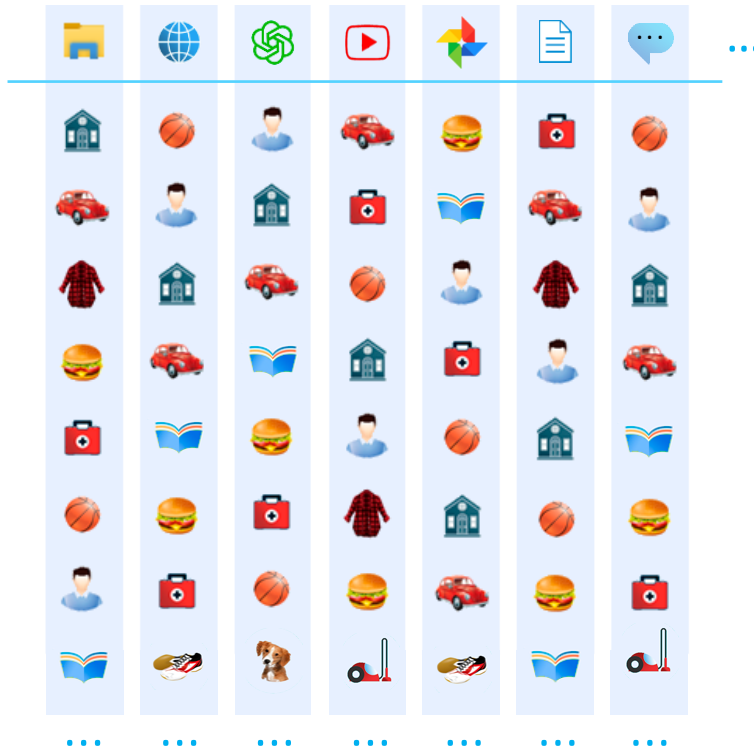

Today it's NOT EASY:

- Accumulate various forms of Knowledge + AI within a selected Topic / Object
- Exchange entire Knowledge Objects + AI between related people / issues / topics
- Connect different Knowledge Objects + AI into a single information structure

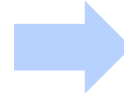

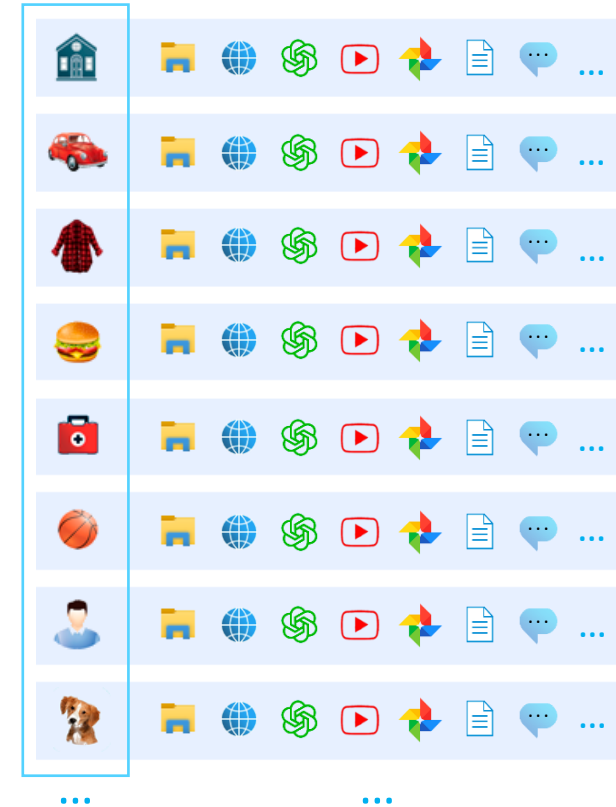

- Existing scatter of Knowledge
by data forms

7-10 information structures

- Proposed organization of Knowledge
by meaning

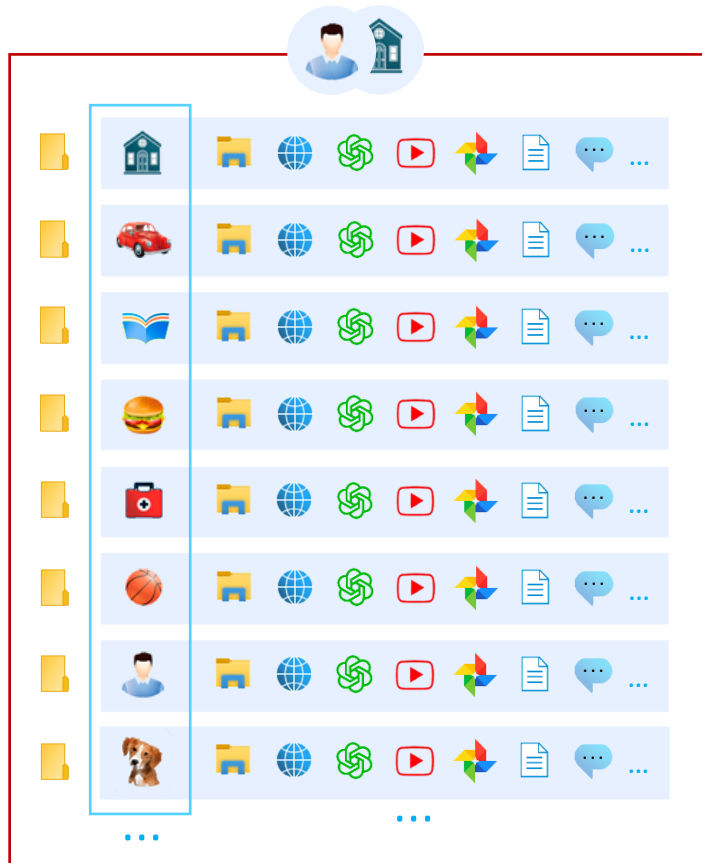

1 integrated
catalog

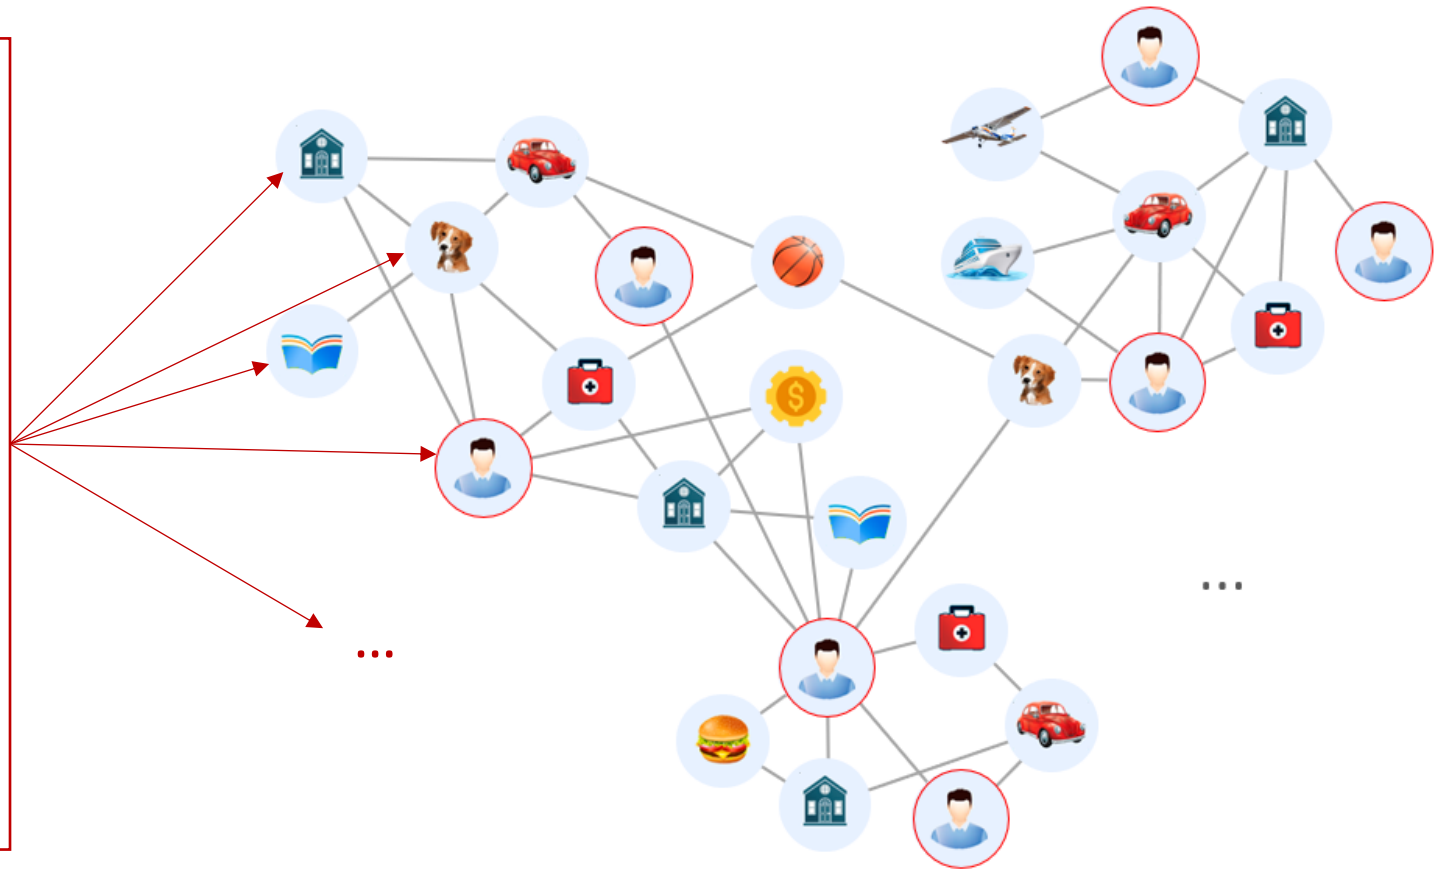

Semantic Network is a combination of interrelated Semantic Hubs

- Semantic Hub

- Semantic Network

Examples of using

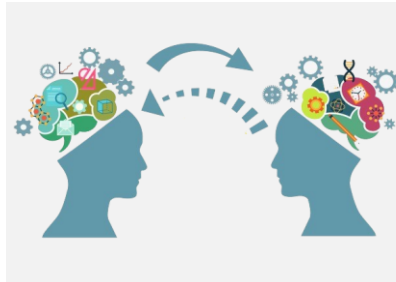

Semantic Models

- **Semantic Accumulation of Knowledge**

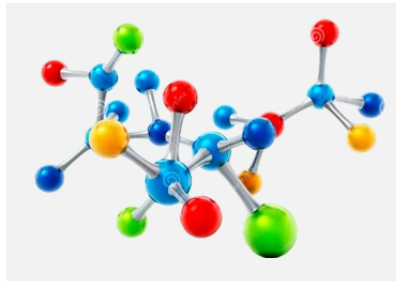

Usual folders of user's personal file catalog:

it's easy now to link with these any forms of knowledge: websites, AI chats, videos, images, documents, maps, events, messages, contacts, etc., rather than scattering knowledge united by one topic across independent information structures of various applications.

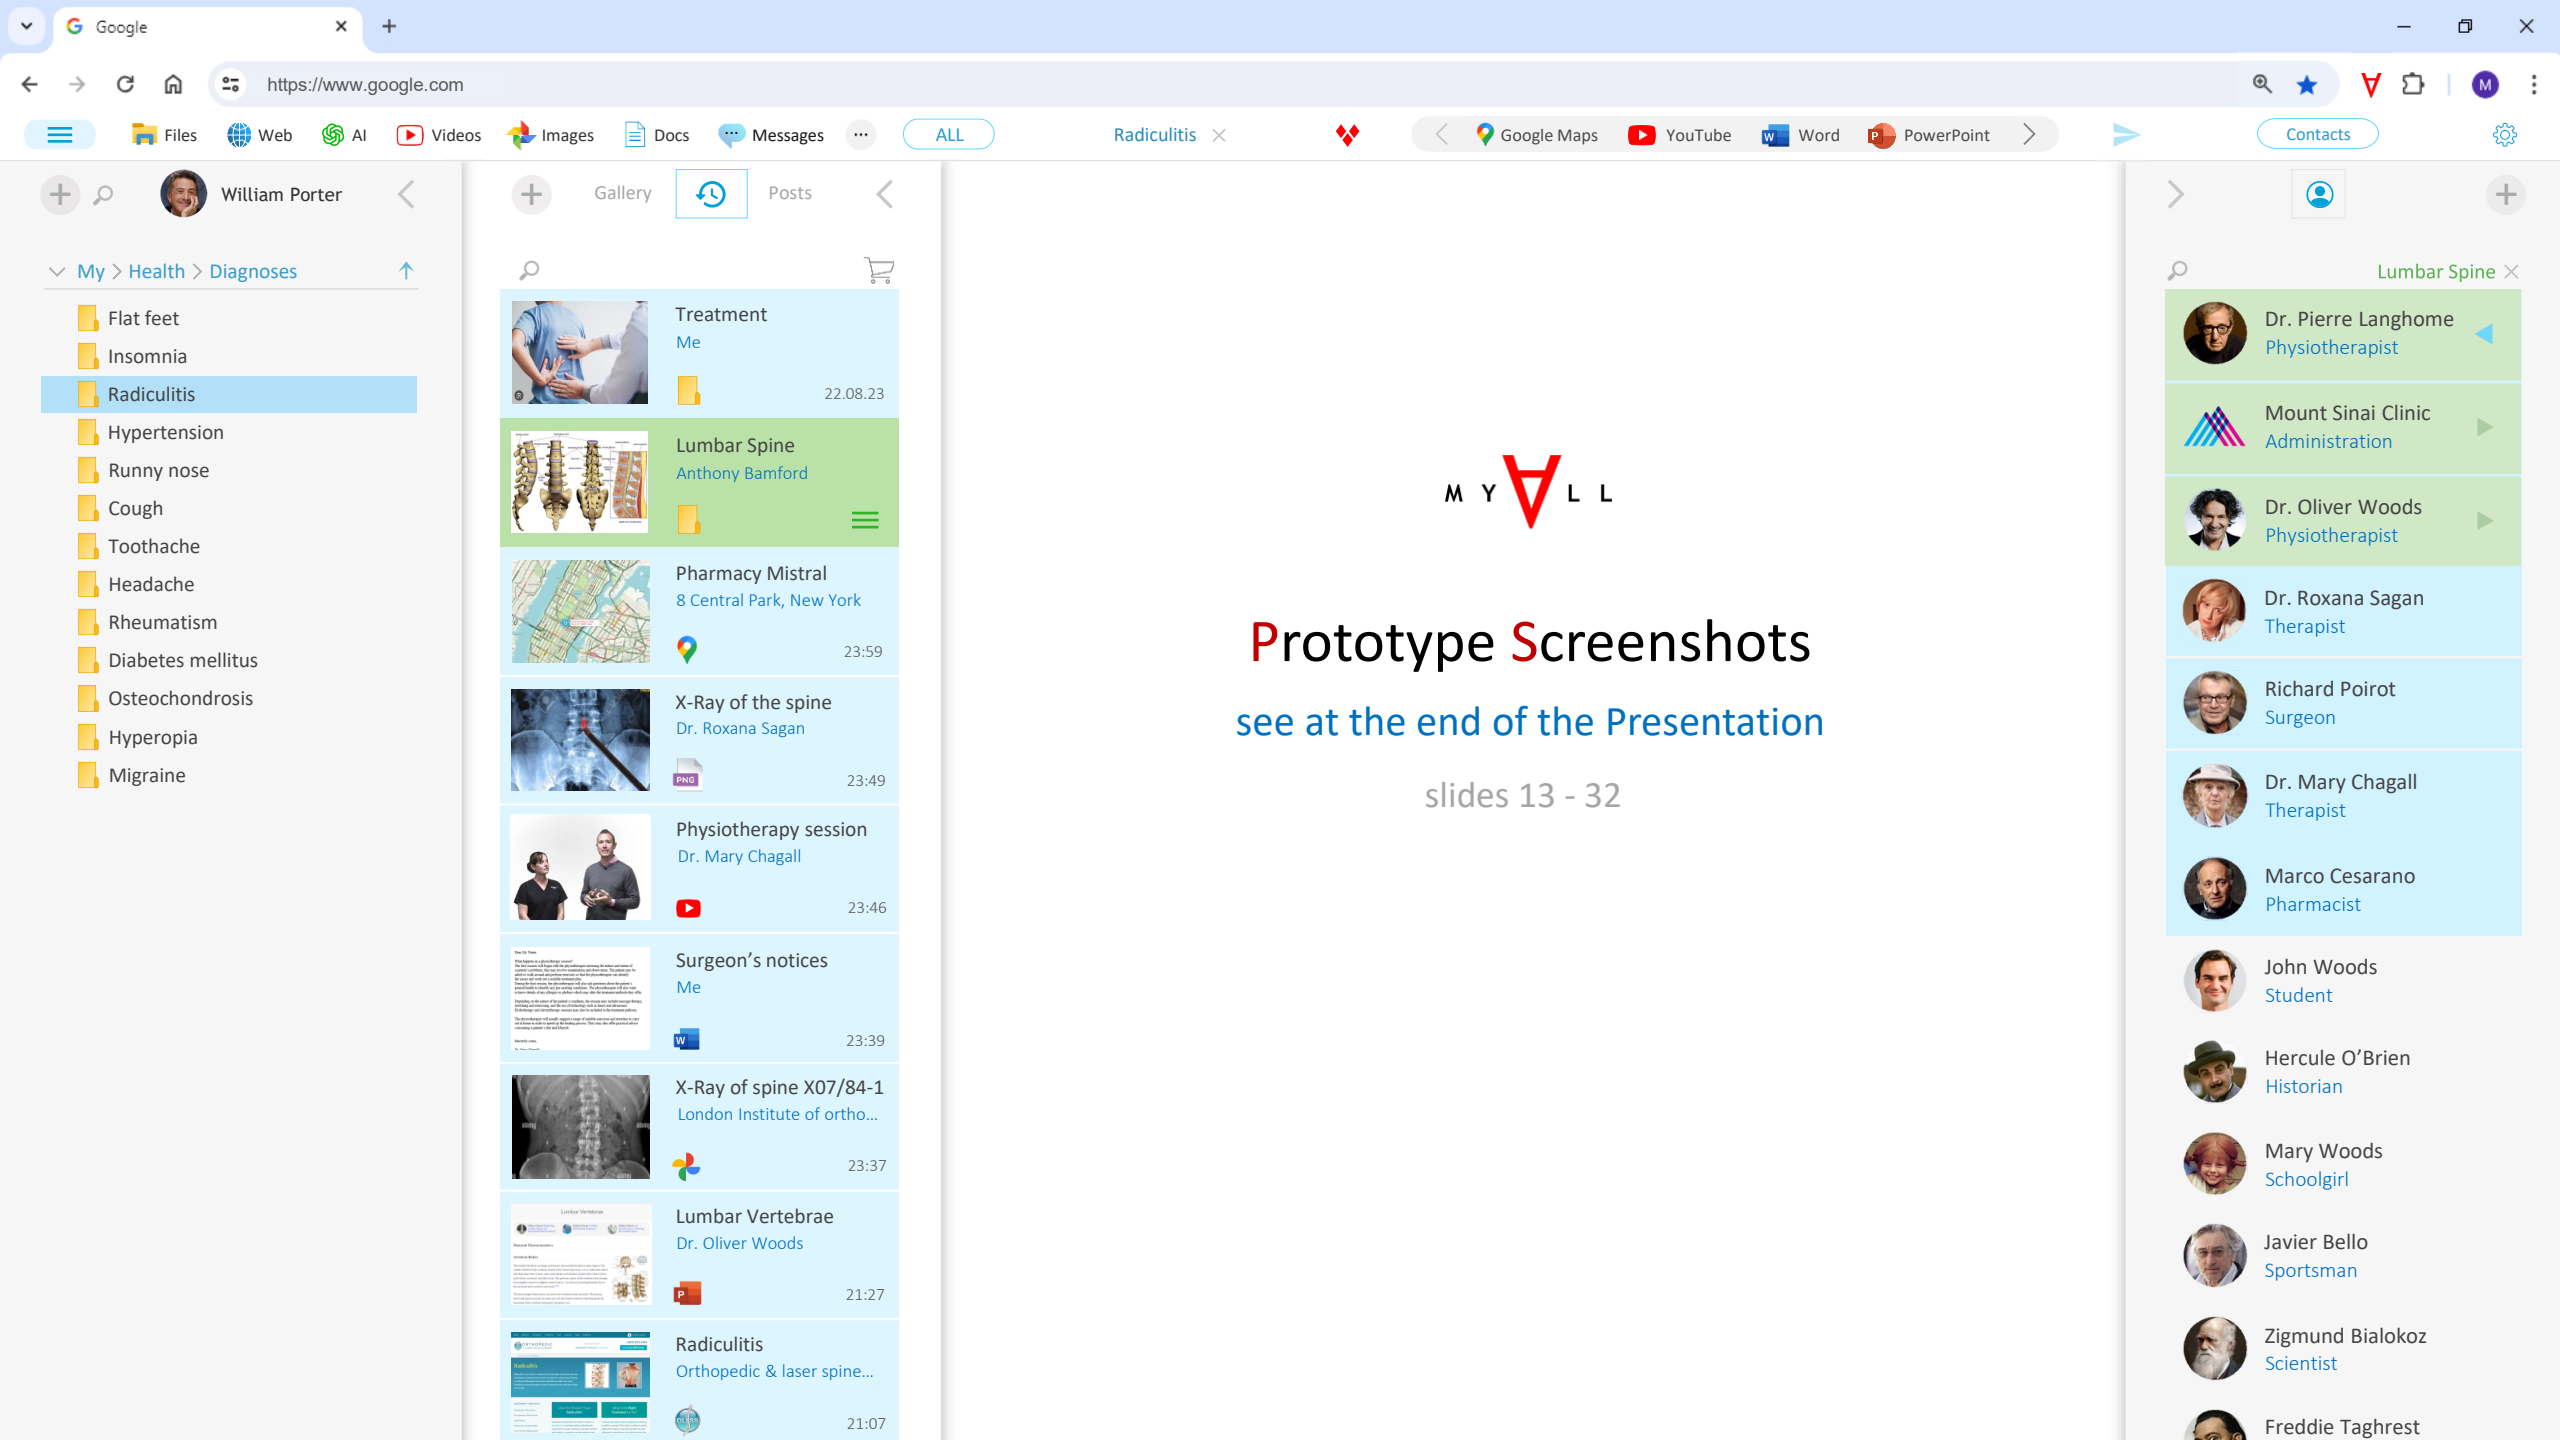

- **Semantic Exchange of Knowledge**

Whether it's a vacuum cleaner, mother-in-law, dissertation materials, a dog, or medicine: now transferring a full range of knowledge about any Object is just 1 click (but not by complex transfers of disparate data sets stored in unrelated applications).

- **Semantic Fusion of Knowledge**

How software drivers bring different hardware together, so the Semantic Network connects any heterogeneous objects into general structures: when assembling a car, house, power plant, etc. - descriptions of individual components are automatically combined into a single whole and form a comprehensive description of the final object.

Competition 1

MY V L L – is a fundamentally new cross-platform web application with the market leader potential, combining the capabilities of various types of Personal Knowledge Management systems

User specifications	MY V L L	Social Networks	Cloud Storages	Online Organizers	Data Systems
• Subordination to the user's single catalog of all his Personal Knowledge + AI	+	-	-	-	-
• Integration of all different data forms in one universal interface	+	-	-	-	-
• Transfer of complete information about objects no matter the variety of data types	+	-	-	+/-	+/-
• Automatic docking of various Knowledge objects into a single information structure.	+	-	-	-	+/-
• Familiar intuitive interface immediately accessible to non-advanced users	+	+	+	+/-	-
		Facebook Instagram Linkedin X / Twitter ...	Google Drive OneDrive Amazon Drive Dropbox ...	Onenote Notion Google Keep Obsidian ...	Airtable Coda Fibery Anytype ...

Competition 2

Reaching audiences by **Personal Knowledge Management** systems

> 90%

of internet users

Ordinary, non-advanced users

Radiculitis

Radiculitis is not really a condition but terminology used to describe the neurological symptoms felt as a nerve is pinched, compressed, irritated, or inflamed. Although it is true that radiculitis can affect any nerve traveling out from the spine, it is most commonly seen in the lower back or the neck.

TREATMENTS for RADICULITIS

Endoscopic Discectomy

Percutaneous Discectomy

Axial Fusion

Endoscopic Foraminotomy

Cervical Disc Replacement

Interlaminar Spacer

Microdiscectomy

How Do I Know if I have Radiculitis?

Symptoms of radiculitis are similar to those of a *pinched nerve*, including tingling, radiating pain along the nerve path, numbness, sensations of pins and needles. Eventually, muscular weakness and loss of reflexes will begin to set in as the condition progresses. Symptoms will be felt in the arms or legs, depending on where your radiculitis is

What is the Right Treatment for Me?

Treating radiculitis involves treating the underlying condition causing it. Most spinal conditions usually begin with treatment plans that include rest, anti-inflammatory medication, stretching and exercises. If the condition has progressed far enough, physical therapy may be needed. Only once conservative treatments have been exhausted

What is Radiculitis?
11:38

Radiculitis, also known as radicular pain, is a medical condition characterized by the inflammation or irritation of the nerve roots that exit the spinal cord. These nerve roots can become compressed, pinched, or damaged due to various factors, leading to symptoms such as pain, numbness, tingling, or weakness along the path of the affected nerve. Radiculitis is often associated with conditions like herniated discs, spinal stenosis, or degenerative disc disease.

What types of Radiculitis are there?
13:04

Radiculitis, also known as radicular pain, can manifest in different ways depending on which nerve roots in the spine are affected and the underlying causes or conditions contributing to the symptoms. Some of the common types of radiculitis include:

1. Cervical Radiculitis: This occurs when nerve roots in the neck region (cervical spine) are affected. Symptoms may include neck pain, radiating pain into the shoulder, arm, and hand, as well as numbness and tingling in these areas. Cervical radiculitis is often associated with conditions like herniated cervical discs or cervical spinal stenosis.

2. Thoracic Radiculitis: This involves nerve roots in the mid-back region (thoracic spine). Thoracic radiculitis is relatively rare compared to cervical and lumbar

Treatment Methods for Radiculitis

14:51

The treatment of radiculitis, also known as radicular pain, depends on the underlying cause and the severity of symptoms. Treatment options can range from conservative measures to more invasive interventions. Here are some common methods used to manage radiculitis:

- 1. Rest:** Initially, resting and avoiding activities that exacerbate symptoms can help relieve pain and reduce inflammation.
- 2. Physical Therapy:** Physical therapy is often prescribed to improve strength, flexibility, and posture, as well as to teach exercises and techniques to alleviate pain and prevent future episodes of radiculitis.
- 3. Pain Medication:**
 - Over-the-Counter (OTC) Pain Relievers:** Non-prescription medications like acetaminophens (NSAIDs) such as ibuprofen (Advil, Motrin) can help reduce pain and inflammation.
 - Prescription Medications:** In some cases, stronger pain medications or muscle relaxants may be prescribed by a healthcare provider to manage more severe pain or muscle spasms.
- 4. Epidural Steroid Injections:** These injections deliver anti-inflammatory steroids directly into the epidural space surrounding the affected nerve root.

Mr. Porter, I send you this video for your information: it confirms my opinion, that your diagnosis isn't worst, and we have a reason for optimism. 😊

Me

Dear Mary, thank you very much, I believe you!
My well-being has improved a lot after watching this video :-)

Dr. Roxana Sagan

Ok! I will prescribe regular video viewings for you as well as the rest of the procedures since it affects you so positively! 😊 See you on the next week.

Mr. Porter, we are sending you this image based on the results of the latest x-ray examination. We didn't see any changes compared to the previous half of the year.

Me

Thank you, I think this information is positive.

Medical Payment Agreement

Mount Sinai Clinic Administration

I. THE PARTIES. This Legal Services Payment Plan Agreement ("Agreement") dated _____, 20____, is by and between:

Medical Office: _____, with a mailing address of _____, City of _____, State of _____, Zip _____ ("Creditor"), and

Patient: _____, with a mailing address of _____, City of _____, State of _____, Zip _____ ("Debtor").

HEREINAFTER, the Debtor and Creditor ("Parties") agrees to the following:

II. BALANCE. At the time of this Agreement, the Debtor owes the Creditor the amount of _____ Dollars (\$_____) ("Current Balance") for medical-related services.

III. DISCOUNTED BALANCE. In consideration of the Debtor's faith to repay the Current Balance in this Agreement, the Creditor agrees to: (check one)

☐ - No Discounted Balance. The Debtor shall pay the full Current Balance ("Amount Owed").

☐ - A Discounted Balance. The Debtor shall only be obligated to pay the discounted amount of _____ Dollars (\$_____) ("Amount Owed"). If the Debtor should default under any of the terms of this Agreement, the Debtor shall owe the Creditor the Current Balance in addition to other penalties, fees, and any accumulated interest.

IV. REPAYMENT PLAN. To satisfy the Amount Owed, the Debtor agrees to repay the Creditor under the following terms:

a.) Down-Payment. The Debtor shall pay: (check one)
☐ - Down-Payment of \$_____.
☐ - No Down-Payment.

b.) Interest Rate. The Amount Owed shall: (check one)
☐ - Bear interest at a rate of _____ percent (____%) compounded annually. The rate must be equal to or less than the usury rate in the State of the Debtor.
☐ - Not bear interest.

c.) Repayment Period. The Debtor shall re-pay the Creditor on a: (check one)
☐ - Monthly basis beginning on _____, 20____, in the amount of \$_____ to be paid on the ____ of every month ending on _____, 20____ or when the Amount Owed is paid-in-full.

New recommendations

Dr. Roxana Sagan
Therapist

Dear William

Allow me to begin by expressing my sincere admiration for your ability to turn nights into real adventures. Frankly speaking, your insomnia skills border on artistry!

I think the culprit is your radiculitis, which doesn't allow you to completely relax at night. As your family doctor, I've decided to offer you some medical measures to improve your sleep and overall well-being.

The prescription, coordinates of the pharmacy I recommend, and a video demonstrating the necessary exercises are attached to this message.

Please note that the suggested medications and ointment have been prescribed solely to enhance your health. The ointment has been specially developed for your feet, which seem to be experiencing some discomfort. We hope it will help you combat flat feet and make your nighttime walks around the room more comfortable.

Best wishes,

Roxana

Radiculitis Overview

William Porter
Me

What is Radiculitis?
11:38

Radiculitis, also known as radicular pain, is a medical condition characterized by the inflammation or irritation of the nerve roots that exit the spinal cord. These nerve roots can become compressed, pinched, or damaged due to various factors, leading to symptoms such as pain, numbness, tingling, or weakness along the path of the affected nerve. Radiculitis is often associated with conditions like herniated discs, spinal stenosis, or degenerative disc disease.

What types of Radiculitis are there?
13:04

Radiculitis, also known as radicular pain, can manifest in different ways depending on which nerve roots in the spine are affected and the underlying causes or conditions contributing to the symptoms. Some of the common types of radiculitis include:

1. Cervical Radiculitis: This occurs when nerve roots in the neck region (cervical spine) are affected. Symptoms may include neck pain, radiating pain into the shoulder, arm, and hand, as well as numbness and tingling in these areas. Cervical radiculitis is often associated with conditions like herniated cervical discs or cervical spinal stenosis.

2. Thoracic Radiculitis: This involves nerve roots in the mid-back region (thoracic spine). Thoracic radiculitis is relatively rare compared to cervical and lumbar
